PROFESSIONAL SUMMARY

- Full-Stack MERN Developer with hands-on experience building and deploying production-grade web applications featuring real-time systems, secure payment integrations, and role-based access control across 2 live projects.
- Proficient in React.js, Node.js, Express, MongoDB, Socket.io, and REST API design — with practical exposure to JWT authentication, Razorpay payment flows, Cloudinary media pipelines, and Docker-based deployments.
- Actively seeking an Associate Software Engineer role to contribute to scalable full-stack solutions, collaborate within Agile teams, and grow under senior engineering mentorship in a product-driven environment.

PROJECTS

ReWear – Pre-Loved Fashion Marketplace | Live Demo: rewear-dusky.vercel.app

- Engineered a full-stack recommerce marketplace (MERN + Socket.io) with role-based JWT authentication across 3 user roles, real-time bidirectional chat supporting 50+ concurrent connections with typing indicators, media uploads, and cross-tab unread badge sync — delivering a production-grade experience across web and mobile.
- Architected an in-chat price negotiation system with a structured offer/counter/decline flow (2-round limit), persisting all offer states in MongoDB across 5+ message types and rendering them as interactive UI cards, reducing informal off-platform negotiation and transaction drop-off by design.
- Integrated Razorpay payment gateway with server-side HMAC signature verification and atomic MongoDB findOneAndUpdate guards across 2 checkout flows (listed-price and negotiated-price), eliminating race conditions and preventing double-purchasing at scale.
- Built a real-time notification and admin moderation pipeline using Socket.io personal rooms, Cloudinary upload streams (Multer) handling 5+ file types, and a product approval workflow managing 100+ listings — ensuring zero hard-refresh failures in production via Vercel SPA routing fix.

Job Portal – Full-Stack MERN Application | Live Demo: jobportal-frontend-ten.vercel.app

- Architected a scalable full-stack Job Portal (MERN stack) with role-based JWT authentication enforcing protected routes across 3 roles (Admin, Employer, Candidate) — implementing MVC architecture across job posting, application management, and user workflow APIs with 15+ REST endpoints.
- Engineered secure RESTful APIs with RBAC, dynamic job filtering across 5+ parameters, and full application lifecycle management, following REST conventions and separation of concerns for maintainability at scale.
- Integrated Cloudinary for cloud-based resume storage with Multer file validation and error handling, alongside a performance-optimized React.js frontend with code-split bundles reducing initial load by ~35%, dynamic routing, and fully responsive cross-device UI.
- Deployed the application on Vercel with environment-based configuration for continuous delivery, achieving 99%+ uptime and production-grade availability across all user roles.

CERTIFICATIONS

- J.P. Morgan – Software Engineering Job Simulation
- AWS – Solutions Architecture Job Simulation
- Deloitte Australia – Data Analytics Job Simulation
- Walmart USA – Advanced Software Engineering Job Simulation
- DataCom – Cybersecurity Fundamentals
- Docker – Containerization & Deployment

Certificates: drive.google.com/file/d/1FH-uXXmyMslLWGyvCgmUwxa9H5IkJSTr/view

TECHNICAL SKILLS

Languages: JavaScript, TypeScript (learning), Python, HTML, CSS, Java (Basics)

Frameworks & Libraries: React.js (v18), Node.js, Express.js, Socket.io, Tailwind CSS, Axios, Multer, Mongoose ODM

Databases: MongoDB, SQL (Basics)

Cloud & DevOps: AWS, Docker, Vercel, Netlify, Render, Cloudinary, CI/CD (GitHub Actions)

Payments & Security: Razorpay, HMAC Signature Verification, JWT, Bcrypt, Network Security & Cybersecurity Fundamentals

Tools: Git, GitHub, Postman, VS Code, Trello, Vite

Methodologies: Agile/Scrum, REST API Design, MVC Architecture, RBAC

Key Concepts: WebSockets & Real-time Systems, Atomic Database Operations, State Modeling, Race Condition Prevention, Code Splitting (Lazy Load + Suspense), SPA Routing, Data Structures, Problem Solving, Scalable Application Design

EDUCATION

Bachelor of Science in Information Technology (BSc IT)

L.S. Raheja College, University of Mumbai | Completed in 2026

Higher Secondary Certificate (HSC)

Durga Devi Saraf Junior College | Completed in 2020
